

Job recommendation

in Prague 15th May 2004

I got to know Dr. Dostal at the 2nd Paediatric department in Motol University Paediatric Hospital in Prague from January 1992 to August 1994 when he prepared for his second paediatric specialisation degree.

Already at this time he proved good theoretical knowledge and a deep interest in paediatrics. At that time we worked in paediatric haematology, pneumology, endocrinology and cardiology together. He gained a broad differential diagnostic experience in paediatrics.

We met again in Medicover, a private health care Clinic for foreigners in Prague, where we are still working together.

Dr. Ctibor Dostal has been working with our private medical company for a few years as a senior consultant in preventive and acute care of children. He has proven his excellent knowledge and skills in paediatrics, and is a reliable person and much loved by his little patients.

In summary, I recommend Dr. Dostal as being well qualified for work at any paediatric clinic.
